HOLISTIKA Application SWs

Holistika LS App

Holistika LS App is an umbrella term that defines the software behind high-quality Papilon scanners, multi-modular biometric workstations, and mobile and handheld registration and identification units.

Holistika Express ID

Holistika Express ID is a system that allows authentication in the field within seconds.

Holistika Express ID, designed with the principle of practical and safe results based on the superior capabilities of Holistika software, can be used in eliminating security threats in the field, in customs and border management, routine dialing, and controls, and detecting watchlisted criminals or suspects. The distributed system structure of Holistika prevents query queues and responds to hundreds of simultaneous queries from many terminals within seconds.
