

# HOLISTIKA Stations

## HOLISTIKA Station 1101

Designed for police units and other institutions that carry out daily biometric / fingerprint and palmprint registration and operational verification of detainees, suspects and other categories of persons. Also designed for intensive use.

## HOLISTIKA Station 4421

Different than HOLISTIKA Station 1101, it uses Papilon LS 4421 for 4 fingerprinting instead of palmprint.

## HOLISTIKA Station F

HOLISTIKA Station F is a multi-functional biometric photography station. The station consists of a photography stand, LED lamps placed at the bottom and the top of the unit to create ideal lighting conditions, and a metal measuring stand that is designed to measure any height between 110 and 180 centimeters. Moreover, this product was created from scratch according to customer requests and demands. HOLISTIKA Station F is the only market available device which merges fingerprints and photos at the same enrollment record.
